Orleans County Medical Society Meet. There was a very interesting and helpful meeting of the Orleans County Medical Society held at Newport Tuesday evening, Jan. 12. Dr. W. J. Aldrich of St. Johnsbury gave a very interesting paper on the "Feeble Minded School," which is to be established in Vermont. Dr. Aldrich being one of the trustees appointed by the Vermont state laboratory gave a very instructive paper on "How to Collect Specimens for Laboratory Examination." Dr. R. M. Wells gave a paper on "The Prophylaxis and Treatment of Typhoid Fever by Vaccines."

LEGISLATURE MOVING

Senate and House of Representatives. Educational Bill Expected Soon. Orleans County Members Banquet.

Orleans county members of committees not named in last week's Monitor are: Anderson of Glover and Adams of Weymouth on the state prison committee; Dubois of Troy on internal affairs and Durgin of Morgan on conservation.

The second week of the legislature marked real progress at Montpelier. The senate and house organizations were completed and bills, many of the important ones, began pouring in. One of the early bills to come before the house is a salary limit bill, which makes the pay of the legislators \$300 for the session. This bill also reduces the mileage allowance from 20 cents to 10 cents per mile and fixes the speaker's salary at \$600 for the session.

An important bill introduced by Senator Powell of Chittenden county and intended to straighten out the judiciary tangle passed the senate under suspension of rules and went to the house. As yet the house has not taken action on the measure. It makes the terms of the judges begin with February 1.

A prohibition bill for Vermont has made its appearance as well as the woman suffrage bill. The much anticipated educational bill is expected soon.

The following account of the banquet of the Orleans County club is taken from the Montpelier Argus: The Orleans County club, consisting of the legislators from Orleans county, had a very enjoyable banquet at the Pavilion hotel Thursday evening. Several distinguished guests were present. Representative F. T. Caswell of Derby, officiated as toastmaster, calling on State Auditor Horace Graham of Craftsbury, who spoke on state finances; Bank Examiner Williams of Newport, who spoke very encouragingly on the conditions of the 57 banks under his supervision; State Forester Austin Hayes of Burlington, whose remarks had to do with forestry matters; Clerk of the House, Harry Black, spoke in a felicitous vein, Senators S. C. Wilcox, of Morgan and H. T. Seaver of Barton, both responded as did also the chaplain of the senate and several others. Judge Willard Miles of Barton, spoke at some length on court procedure, pointing out that it is not the county courts that are increasing in cost, and that the increase of expenses in the department of justice cannot be charged up to county or supreme court. The cost of the past year was only \$14,444 above the cost in 1906, when the dual arrangement was effected, and that the greater part of that increase can be accounted for by the increase of judges' salaries, witness fees and jurymen's fees. He suggested that if the courts be given discretionary power of amendment, from law to chancery and vice versa, expenses could be further reduced. He spoke of the care taken in changing and amending of the rules, the work extending from 1907 to Sept. 1, 1909, when the new rules were promulgated. He considered them as near perfect as was possible to make them, but if the legislature could improve upon them the court would be pleased. Our county courts as now constituted and conducted, give every man who is ready to have his case tried, an opportunity to try it. Justice is not delayed by the rules of procedure. Felonious homicides are tried in Vermont with very great despatch. It costs more to empanel a jury for such a case in some states than it does to conduct the trials for a year in Vermont.

In this particular vicinity all roads lead to Parker pond where on several days more than 50 pickerel have been taken and on one day last week the total catch for the day was over 100. Several lakes and ponds have been designated as being open waters this winter, these lakes and ponds not being inhabited by trout or fish belonging to the trout family, and for the past two weeks there have been very few days when a party has not been at one of these fishing places. NEW SCHEDULE OF CLASSES

On Monday we took up an entirely new program of studies. There has been such a shift in the periods and so much of our time for studying chopped off that we will find it a bit difficult to accustom ourselves to the new order of things. But we like this new program for there are several new features that we must all welcome. We are to have penmanship three times a week for the rest of the year. Until now, no provision had been made for this work. Arrangements have been made with Mrs. Heath whereby she is enabled to devote forty minutes three days a week to this work. The pupils have been placed in two divisions, each division to be given instruction for twenty minutes. There are twenty-four freshmen girls who are made happy by the new program, for they are now given an opportunity to elect the new work in domestic science. This course will consist of sewing for three and cooking for two days each week. If one were to judge by the number who are taking domestic science, one would say that the study is exceedingly popular with the girls. Even a number of the boys wish that they might be allowed to elect it.

SCHOOL NOTES

The school wishes to thank those townspeople who have purchased skating rink season tickets. The receipts from the sale of tickets and from the single admissions total \$24.26. We believe that after the cost of upkeep has been met, there should remain a neat little nest egg to go toward spring athletics. At present the ice is in excellent shape. However, it will be necessary for the fellows to make skating possible. Skating on Sunday will not be permitted.

Cliff Dunham says that when he grows up to be a man he is going to invent a plane geometry in which all adjacent will be adjoining angles.

The lid is now on tight—no more fifteen minute conferences during study hours.

Lost, either on the rink or in the French 11 class Thorp's chewing gum.

Ruth Paddiford, '16, who spent her vacation in Whitman, Mass., has returned to school.

Wanted, two heavyweights to teach Walter Buckley how to skate.

The sophomores held a class meeting Jan. 13.

The much looked for mid-year exams are listed for Jan. 23 and 29.

Not only has the skating rink afforded splendid amusement to the young people but over \$30 in profits has been realized from it.
